TRIPLE DUTY VALVES

SIZE: 2½" to 12"

GENERAL DATA

ANSI 125 / ANSI 250

PREFACE

The **NORTHAM** NG-T Series Triple Duty Valves save space and reduces purchase and installation costs by combining all the functions normally required on the discharge side of most HVAC systems into one convenient design. It features a calibrated balance valve, non-slam check valve, and positive shut-off valve all combined into one.

The calibrations on the Triple Duty Valve allows you to accurately set your system flow rate and it also helps you easily reset the valve after shut-off. The soft seat design of the disc prevents noise and potential damage that can be associated with valve chatter. It also provides positive shut-off allowing you to isolate the pump from the rest of your system. The non-slam check valve prevents backflow and gravity circulation in staged pumping and parallel pumping systems, preventing damage to the pump and unwanted heat transfer through your system.

With our wide range of sizes, end connections, and valve configurations the Northam Triple Duty Valve is a great complement for your HVAC pump and system needs.

FEATURES

- ▶ Performs as spring-loaded non-slam check, balancing, shut-off and throttling valve.
- ▶ Soft seated and accurately guided spring loaded disc ensures a leak free seal.
- ▶ The triple duty valves have been designed using CFD techniques to minimize head loss.
- ▶ Valve can be inline or right angle configuration.
- ▶ Drain plugs are provided at inlet and outlet of valve.
- ▶ Compact design.
- ▶ Spring-loaded disc ensures positive sealing and eliminates chatter.
- ▶ Flanges as per ANSI 125, ANSI 250, PN 16 and PN 25.

APPLICATIONS

- ▶ HVAC chilled water plants for air Conditioning of buildings, shopping malls, auditoriums, sports complexes, airports, etc.
- ▶ HVAC chilled water plants for Industries like pharmaceuticals, food & beverage, chemical, manufacturing etc.

TECHNICAL DATA

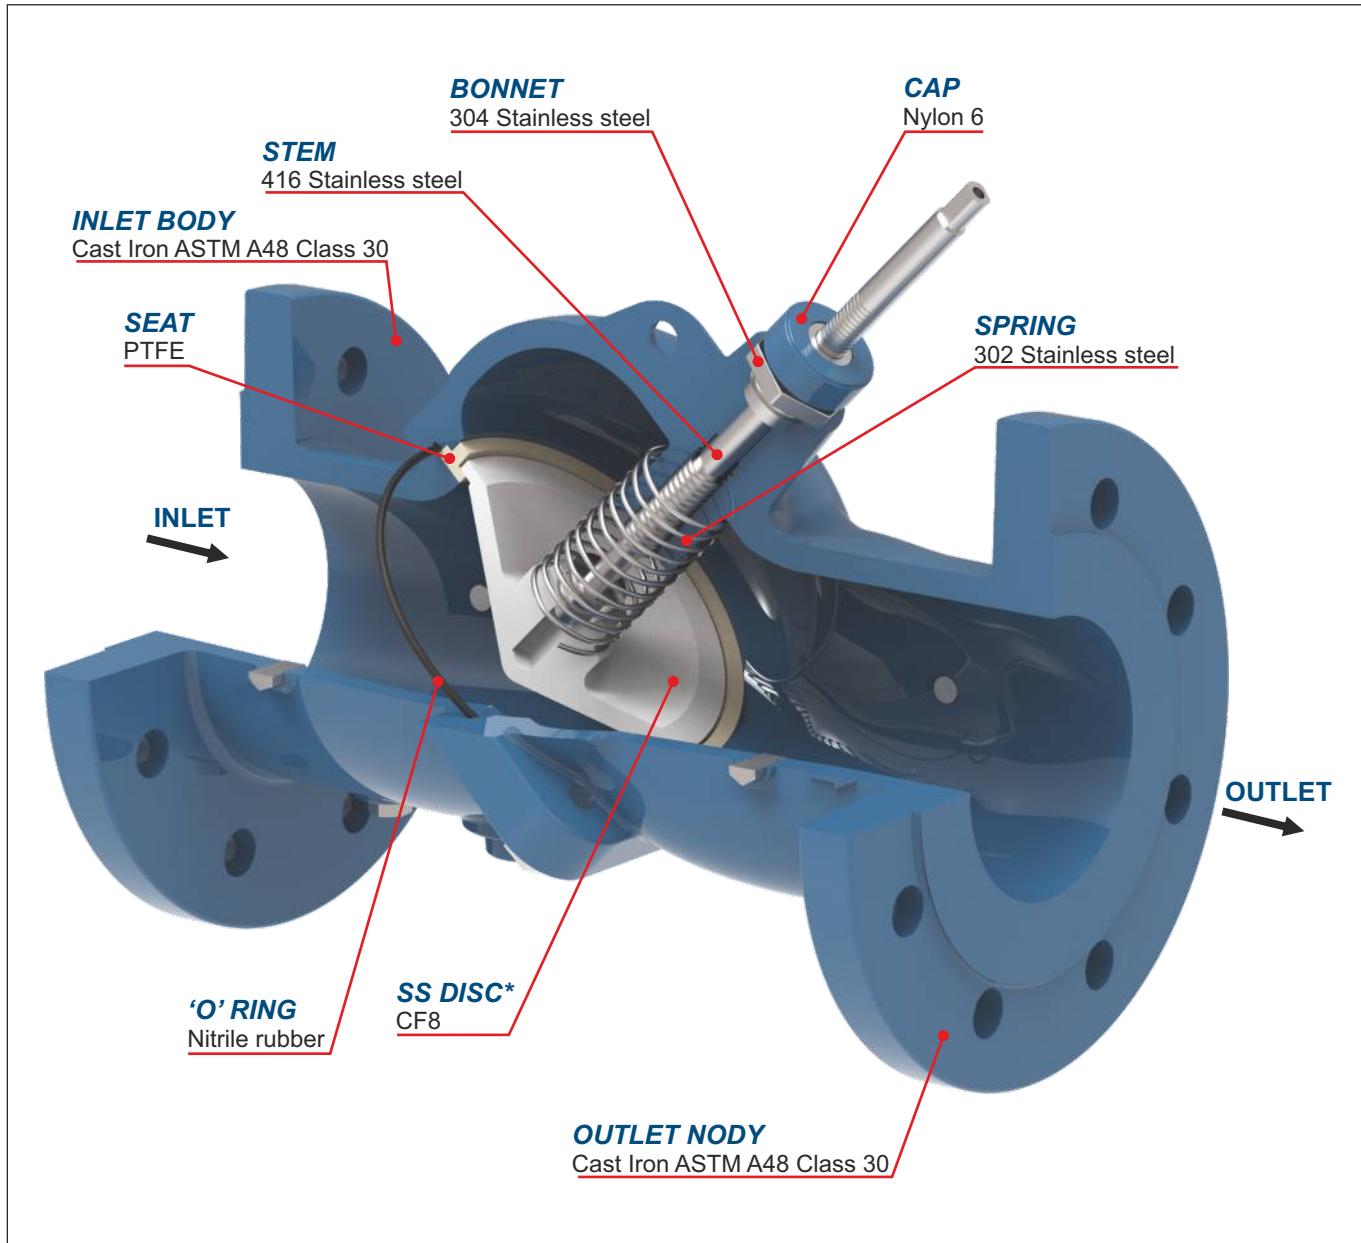

Connection size	2½" inch to 12 inch
Pressure rating	125 psi, 250 psi, 16 bar, 25 bar
